DETAILED ACTION

1. Newly submitted claims **44-46** directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

- I. Claims **1-43**, drawn to integrated circuit with variable and fixed threshold transistors, classified in class 257, subclass 390-391.
- II. Claims **44-46**, drawn to Gate Array, classified in class 257, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related products: The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are not obvious variants. A circuit with "a plurality of distributed programmable I/O units; a plurality of distributed programmable logic units; a plurality of hardwire logic units; a plurality of hardwired RAM files; a plurality of hardwired multilevel storage cell (MLC) arrays; and a programming facility for programming the distributed programmable logic units wherein software and hardware constructs are provided to the other elements of the circuit via a host system" *is not an obvious variant of a circuit comprising, "a plurality of fixed threshold and variable threshold transistors; a plurality of Schottky barrier diodes; a plurality of poly silicon film resistors; a plurality of capacitors; and a plurality of wiring tracks, wherein all of the elements are on a single substrate to*

form integrated circuits with implementing macro functions". These two inventions are distinct.

2. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims **44-46** are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

5. The amendment filed on 20 June 2007 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03).

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS,

Art Unit: 2815

whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul A. Budd whose telephone number is 571-272-1664. The examiner can normally be reached on Monday to Friday 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ken Parker can be reached on 571-272-2298. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
